AMENDMENT

In response to the Office Action mailed December 2, 1997, please make the below-identified amendments and consider the following remarks:

IN THE SPECIFICATION:

Please amend the specification as follows:

Page 5, line 23; delete "cross-sectional illustrative" and insert --cross-section schematic--.

IN THE CLAIMS:

Please amend the following claims as indicated.

1. (THRICE AMENDED) A gas turbine engine component comprising:

a metallic compressor airfoil having a leading edge and a trailing edge and a pressure side and a suction side,

at least a first laser shock peened surface on a first side of said airfoil,

said laser shock peened surface extending radially along at least a portion of said leading edge and extending chordwise from said leading edge, and

a first region having deep compressive residual stresses
